

Coding & Solution

Date	29.09.2026
Team ID	SWTID-2026-7365
Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	Salesforce Org - Developer Edition (No external repository, org-based development)
Programming Language(s)	Salesforce Configuration - Apex, Flow Builder, Validation Rules
Framework(s) Used	Salesforce Lightning Platform, Lightning App Builder, Flow Automation
Key Features Implemented	Student, Course, Instructor, Enrollment custom objects; Lookup relationships; Validation rules; Approval process; Flow automation; Reports & Dashboards; Security via Profiles & Permission Sets
Pending / Incomplete Features	Lightning App final testing, Page Layouts fine-tuning, Approval Process testing evidence, Flow test coverage screenshots, Deployment documentation
Setup / Run Instructions	1. Create Salesforce Developer Org 2. Create custom objects: Student, Course, Instructor, Enrollment 3. Create fields, lookup relationships, validation rules 4. Configure Flows, Approval Process 5. Create Reports, Dashboards, Profiles and test enrollment flow

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to version control repository	Yes

Additional Notes / Comments:

The SECMS project is implemented on Salesforce platform with custom objects (Student, Course, Instructor, Enrollment), validation rules, approval process and automation Flows. All modules are reusable and follow Salesforce best practices. Reports and Dashboards provide enrollment tracking and academic monitoring. Implementation evidence and testing screenshots are documented.
