

Problem-Solution Fit

Date	30 September 2026
Team ID	SWTID-2026-7365
Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	5 Marks

Problem-Solution Fit Canvas

The canvas checks that SECMS addresses the root causes and behaviors of its target users.

1. CUSTOMER SEGMENT(S) [CS] - Enrollment Officers - Administrators - Students needing course enrollment	6. CUSTOMER LIMITATIONS [CL] - Manual record keeping - Scattered data across spreadsheets and emails	5. AVAILABLE SOLUTIONS - PROS & CONS [AS] - Spreadsheets: easy but error-prone - Standalone portal / ERP: more effort and integration - SECMS: centralized, automated, needs Salesforce
2. PROBLEMS / PAINS + FREQUENCY [PR] - Scattered enrollment data - Delayed reporting - Duplicate entries - Approval bottlenecks	9. PROBLEMROOT / CAUSE [RC] - Manual and fragmented enrollment handling - Unintegrated systems	7. BEHAVIOR + INTENSITY [BE] - Rechecks information repeatedly - Follows up manually
3. TRIGGERS TO ACT [TR] - A new enrollment or re-enrollment request - Need for timely approval and revenue visibility	10. YOUR SOLUTION [SL] Salesforce-based SECMS with objects, validation rules, approval process, flows, reports, dashboard and security	8. CHANNELS OF BEHAVIOR [CH] - ONLINE: Salesforce Lightning app, email notifications - OFFLINE: spreadsheets and manual follow-up (before SECMS)
4. EMOTIONS BEFORE / AFTER [EM] - Before: concerned about duplicates, errors and revenue loss - After: confident with automation, dashboards and centralized information		

Problem-solution fit: SECMS aligns each identified problem with a Salesforce-native capability. Fragmented records are addressed through centralized objects; manual process steps through flows and approvals; data-quality needs through validation rules; and monitoring needs through reports and dashboards.
