

Solution Architecture

Date	30 September 2026
Team ID	SWTID-2026-7365
Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	5 Marks

Solution Architecture Diagram

The architecture integrates the Salesforce user interface with custom objects, automation flows, approval processing, reporting, dashboards and security layers. The Student, Course, Instructor and Enrollment objects form the core data model; Enrollment records reference the related Student, Course and Instructor records through lookup relationships.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	User interface for Student, Course, Instructor and Enrollment records, with navigation for reports and dashboards.	Salesforce Lightning App, tabs, page layouts
Automation Layer	Sets enrollment dates, sends approval notifications, assigns instructors by course category and creates follow-up tasks.	Salesforce Flow, Approval Process
Core Logic	Applies data validation and separates New Enrollment from Re-Enrollment processing.	Validation Rules, Record Types
Database	Stores relational academic records and enrollment data.	Salesforce Custom Objects and lookup relationships

Component Name	Description / Role in Architecture	Technologies Used
Analytics Layer	Provides operational reports and the management dashboard.	Salesforce Reports and Dashboards
Security Layer	Controls access to objects, fields and records by role.	Profiles, Permission Sets, Sharing / OWD
