1. PROJECT OVERVIEW

The Student Enrollment & Course Management System (SECMS) is a Salesforce application designed to streamline and automate academic enrollment operations. It manages student records, course offerings, enrollments, instructor assignments, approval processes, payments, reporting, and dashboards in one environment.

1.1 Purpose

- Accurate student data management
- Structured enrollment workflows
- Automated approvals and validations
- Transparent reporting and monitoring

1.2 Main Features

Student Management

Course Management Enrollment

Processing Instructor

Assignment Validation Rules

Approval Process

Lightning App

Page Layouts and Record Types

Flow Automation

Reports and Dashboards Security

Setup

2. IDEATION PHASE

2.1 Problem Statement

Enrollment officers need to manage student enrollments efficiently, but data may be scattered across systems and manual processes can be time-consuming and error-prone. Administrators also need centralized information for enrollment and revenue monitoring.

2.2 Empathy Map

Think & Feel: Concerned about double bookings and revenue loss.

Hear: Complaints from students and management.

See: Multiple spreadsheets and emails.

Say & Do: Rechecks data and follows up manually.

Pain: Duplicate entries and approval bottlenecks.

Gain: Automation, dashboards, and faster processing.

2.3 Brainstorming & Prioritization

- Spreadsheet automation
- Standalone enrollment portal
- ERP integration
- Salesforce-based enrollment system

The Salesforce-based SECMS solution was selected for the project.

3. REQUIREMENT ANALYSIS

3.1 Customer Journey

- Awareness & Registration
- Course Selection
- Enrollment Request
- Fee Payment
- Approval
- Instructor Assignment
- Reporting & Completion

3.2 Functional Requirements

FR-1 Student Management – Manage student records

FR-2 Course Management – Create and manage courses

FR-3 Enrollment Processing – Request, approve and reject enrollments

FR-4 Instructor Assignment – Auto-assign instructors

FR-5 Reporting – Dashboards and reports

3.3 Non-Functional Requirements

- Usability
- Security
- Reliability
- Performance
- Scalability
- Availability

3.4 Technology Stack

- UI – Salesforce Lightning
- Logic – Salesforce Flows
- Database – Salesforce Objects
- Automation – Validation Rules and Approval Process
- Reporting – Reports & Dashboards

Milestone1–SalesforceDeveloperAccountCreation

Purpose: Create the Salesforce environment for the project.

Steps:

1. Open the Salesforce Developer signup page.
2. Enter first name, last name and email.
3. Select the Developer role.
4. Enter the college name as Company.
5. Select India and enter postal code.
6. Create a username in the required format.
7. Submit the signup form.
8. Open the verification email and activate the account.
9. Set the password and security question.
10. Open the Salesforce Setup page.

SALESFORCE DEVELOPER ACCOUNT CREATION

The screenshot shows the Salesforce Developer Edition signup page on a mobile device. The page has a blue header with the text "apps, ship agents, and let coding agents do the heavy lifting with Salesforce Headless 360." Below the header, the main heading is "Sign up for your Developer Edition". Underneath, it says "A free Salesforce Platform environment with Agentforce and Data 360". The form fields are as follows:

- Job title: Salesforce Administrator (with a checkmark icon)
- Country/region: India (with a checkmark and dropdown arrow icon)
- State/province: Tamil Nadu (with a checkmark and dropdown arrow icon)
- Work email: swathidhandapani2006@g... (with a checkmark icon)

At the bottom, there is a checkbox labeled "I agree to the [Main Services Agreement](#) – [Developer Services](#), [Salesforce Program Agreement](#), and [API Terms of Service](#)". A blue circular icon with a white telephone handset is positioned to the right of the checkbox.

Milestone 2 – Student Custom Object

Purpose: Store student personal, contact and enrollment information.

Steps:

11. Open Setup → Object Manager.
12. Click Create → Custom Object.
13. Set Label as Student.
14. Set Plural Label as Students.
15. Set Record Name as Student Name.
16. Choose Text as the data type.
17. Enable Allow Reports.
18. Enable Allow Activities if required.
19. Enable Track Field History if required.
20. Enable Allow Search.
21. Click Save.

EVIDENCE OF STUDENT CUSTOM OBJECT

The screenshot displays the Salesforce Object Manager interface. The top navigation bar includes the 'Setup' menu and the 'Object Manager' dropdown. The main header shows 'Object Manager' with a 'Quick Find' search bar and buttons for 'Schema Builder' and 'Create'. A dropdown menu is open under 'Create', showing 'Custom Object' and 'Custom Object from Spreadsheet'. Below the header, a table lists standard objects. The table has columns for 'LABEL', 'API NAME', 'TYPE', 'DESCRIPTION', and 'LAST MODIFIED'. The objects listed are Account, Activity, DevopsActivityLog, Address, AgentWork, AlternativePaymentMethod, ApiAnomalyEventStore, AppointmentCategory, and AppointmentInsights.

LABEL	API NAME	TYPE	DESCRIPTION	LAST MODIFIED
Account	Account	Standard Object		
Activity	Activity	Standard Object		
Activity History	DevopsActivityLog	Standard Object		
Address	Address	Standard Object		
Agent Work	AgentWork	Standard Object		
Alternative Payment Method	AlternativePaymentMethod	Standard Object		
API Anomaly Event Store	ApiAnomalyEventStore	Standard Object		
Appointment Category	AppointmentCategory	Standard Object		
Appointment Insights	AppointmentInsights	Standard Object		

Milestone2–Course,InstructorandEnrollment Objects

Purpose: Create the remaining project objects.

Steps:

22. Open Object Manager.
23. Create Course custom object.
24. Create Instructor custom object.
25. Create Enrollment custom object.
26. Enable required reporting/search options.
27. Save each object.
28. Verify all four objects in Object Manager.

EVIDENCE OF COURSE

The screenshot shows the Salesforce 'New Custom Object' setup page. The browser address bar displays 'orgfarm-7d0d02cad2-dev-ed.develop.my.salesforce-setup.com/lightning/setup/ObjectManager/new'. The page header includes 'Developer Edition' and a 'Search Setup' bar. The main navigation bar shows 'Setup', 'Home', and 'Object Manager'. The page title is 'New Custom Object'. A yellow message bar states: 'Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles. [Tell me more!](#) [Don't show this message again](#)'. The 'Custom Object Definition Edit' section contains the following fields:

- Label:** Course (Example: Account)
- Plural Label:** Courses (Example: Accounts)
- Starts with vowel sound:** ☐
- Object Name:** Course (Example: Account)
- Description:** (Empty text area)

Buttons for 'Save', 'Save & New', and 'Cancel' are located at the top right of the form.

Milestone 3 – Student Fields

Purpose: Create fields required for student records.

Steps:

29. Open Student → Fields & Relationships.
30. Verify Student Name.
31. Create Email as Email.
32. Create Phone as Phone.
33. Create Date of Birth as Date.
34. Create Student Status as Picklist.
35. Create Address as Text Area.
36. Save and verify all fields.

EVIDENCE OF STUDENT FIELDS

The screenshot displays the Salesforce 'New Custom Object' configuration page. The browser address bar shows the URL: `orgfarm-7d0d02cad2-dev-ed.develop.my.salesforce-setup.com/lightning/setup/ObjectManager/new`. The page header includes the 'Developer Edition' label and a search bar. The main content area is titled 'New Custom Object' and contains the following sections:

- Record Name:** 'Student Name' (Example: Account Name)
- Data Type:** 'Text' (Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.)
- Optional Features:**
 - ☒ Allow Reports
 - ☒ Allow Activities
 - ☒ Track Field History
 - ☐ Allow in Chatter Groups
 - ☐ Enable Licensing
- Object Classification:**

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more.](#)

 - ☒ Allow Sharing
 - ☒ Allow Bulk API Access
 - ☒ Allow Streaming API Access
- Deployment Status:** (Link: [What is this?](#))

Milestone 3 – Course Fields

Purpose: Create fields required for course records.

Steps:

37. Open Course → Fields & Relationships.
38. Create Course Name.
39. Create Category as Picklist.
40. Create Duration as Number/Text.
41. Create Course Fee as Currency.
42. Create Description as Text Area.
43. Save and verify the fields.

Milestone 3 – Instructor Fields

Purpose: Create fields required for instructor records.

Steps:

44. Open Instructor → Fields & Relationships.
45. Create Instructor Name.
46. Create Instructor Code as Text.
47. Create Expertise as Picklist.
48. Create Phone as Phone.
49. Create Email as Email.
50. Save and verify the fields.

EVIDENCE OF INSTRUCTOR FIELDS

The screenshot shows the Salesforce Setup interface for creating a new custom object. The browser address bar displays the URL: `orgfarm-7d0d02cad2-dev-ed.develop.my.salesforce-setup.com/lightning/setup/ObjectManager/new`. The page title is "New Custom Object".

When referenced via the API:

- Record Name: Example: Account Name
- Data Type: Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.

Optional Features

- ☒ Allow Reports
- ☒ Allow Activities

Milestone 3 – Enrollment Fields

Purpose: Create fields required for enrollment records.

Steps:

51. Open Enrollment → Fields & Relationships.
52. Create Student lookup.
53. Create Course lookup.
54. Create Instructor lookup.
55. Create Enrollment Date as Date.
56. Create Enrollment Status as Picklist.
57. Create Fees Paid as Checkbox.
58. Create Total Amount as Currency.
59. Create Comments as Text Area.
60. Save and verify.

EVIDENCE OF ENROLLMENT FIELDS

The screenshot shows the Salesforce Setup interface for creating a new custom object. The browser address bar displays the URL: `orgfarm-7d0d02cad2-dev-ed.develop.my.salesforce-setup.com/lightning/setup/ObjectManager/new`. The page title is "New Custom Object".

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called when referenced via the API.

Record Name: Example: Account Name

Data Type: Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.

Optional Features

- ☒ Allow Reports
- ☒ Allow Activities
- ☒ Track Field History
- ☐ Allow in Chatter Groups
- ☐ Enable Licensing

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more.](#)

- ☒ Allow Sharing
- ☒ Allow Bulk API Access
- ☒ Allow Streaming API Access

Milestone4–EnrollmenttoStudentRelationship

Purpose: Link an Enrollment to its Student.

Steps:

61. Open Setup → Object Manager → Enrollment.
62. Open Fields & Relationships → New.
63. Select Lookup Relationship.
64. Select Student as Related To.
65. Enter Field Label Student.
66. Continue through security and layout settings.
67. Save.

EVIDENCE OF ENROLLMENT TO STUDENT RELATIONSHIP

The screenshot shows the Salesforce Setup interface, specifically the 'Enrollment' object in the 'Fields & Relationships' section. The table lists 12 fields with their labels, names, data types, and whether they are indexed. The 'Student' field is highlighted, showing it is a lookup relationship to the 'Student' object.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Comments	Comments__c	Text Area(255)		
Course	Course__c	Lookup(Course)		✓
Created By	CreatedById	Lookup(User)		
Enrollment Date	Enrollment_Date__c	Date		
Enrollment Status	Enrollment_Status__c	Picklist		
Enrollment Name	Name	Text(80)		✓
Fees Paid	Fees_Paid__c	Checkbox		
Instructor	Instructor__c	Lookup(Instructor)		✓
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User Group)		✓
Student	Student__c	Lookup(Student)		✓
Total Amount	Total_Amount__c	Currency(18, 0)		

Milestone4–EnrollmenttoCourseRelationship

Purpose: Link an Enrollment to its Course.

Steps:

68. Open Enrollment → Fields & Relationships → New.
69. Select Lookup Relationship.
70. Select Course as Related To.
71. Enter Field Label Course.
72. Set visibility and layout.
73. Save.

EVIDENCE OF ENROLLMENT TO COURSE RELATIONSHIP

The screenshot shows the Salesforce Setup interface for the 'Course' object. The 'Fields & Relationships' section is active, displaying a list of 8 fields. The left sidebar contains navigation links for various setup areas. The main table lists fields with their labels, names, data types, and whether they are indexed.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Category	Category__c	Picklist		
Course Fee	Course_Fee__c	Currency(18, 0)		
Course Name	Name	Text(80)		✓
Created By	CreatedById	Lookup(User)		
Description	Description__c	Text Area(255)		
Duration	Duration__c	Number(18, 0)		
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓

Milestone4–EnrollmenttoInstructorRelationship

Purpose: Store the instructor assigned to an enrollment.

Steps:

74. Open Enrollment → Fields & Relationships → New.
75. Select Lookup Relationship.
76. Select Instructor as Related To.
77. Enter Field Label Instructor.
78. Complete security and layout settings.
79. Save.

EVIDENCE OF ENROLLMENT TO INSTRUCTOR RELATIONSHIP

The screenshot shows the Salesforce Setup interface for the 'Instructor' object. The 'Fields & Relationships' section is active, displaying a list of 8 fields. The fields are sorted by Field Label. The table below represents the data shown in the screenshot.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedById	Lookup(User)		
Email	Email__c	Email		
Expertise	Expertise__c	Picklist		
Instructor Code	Instructor_Code__c	Text(12)		
Instructor Name	Name	Text(80)		✓
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User Group)		✓
Phone	Phone__c	Phone		

The interface includes a left sidebar with navigation options like Details, Fields & Relationships, Page Layouts, and others. The top navigation bar shows 'Setup' and 'Object Manager'. The bottom status bar displays system information like temperature, search, and time.

Milestone 5 – Student Email Domain Validation

Purpose: Ensure that students use an allowed institutional email address.

Steps:

80. Open Student in Object Manager.
81. Click Validation Rules → New.
82. Enter Rule Name Student_Email_Domain_Validation.
83. Enter the required domain validation condition.
84. Set error message: Email must be a valid student institutional email.
85. Set error location to Email.
86. Save the rule.

EVIDENCE OF STUDENT EMAIL DOMAIN VALIDATION

Milestone 5 – Fees Before Approval Validation

Purpose: Prevent approval when fees have not been paid.

Steps:

87. Open Enrollment → Validation Rules → New.
88. Enter Rule Name Fees_Must_Be_Paid_Before_Approval.
89. Create a condition checking Approved status and Fees Paid = FALSE.
90. Enter error message: Fees must be paid before approving an enrollment.
91. Choose the error location.
92. Save.

EVIDENCE OF FEES BEFORE APPROVAL VALIDATION

Milestone 6 – Enrollment Approval Process

Purpose: Route Requested enrollments for manager approval.

Steps:

93. Open Setup → Approval Processes.
94. Select Enrollment.
95. Choose Create New Approval Process → Standard Setup.
96. Enter Process Name Approval_Enrollment_Request.
97. Set entry criteria to Requested.
98. Add Training Manager as approver.
99. Set Final Approval Action to Approved.
100. Set Final Rejection Action to Rejected.
101. Add rejection email alert if required.
102. Activate the process.

EVIDENCE OF ENROLLMENT APPROVAL PROCESS

The screenshot displays the Salesforce Setup interface for the 'Approval Processes' section. The process being configured is 'Enrollment: Approval_Enrollment_Request'. The 'Process Definition Detail' section shows the process is active, with a unique name of 'Approval_Enrollment_Request' and a description of 'Approval_Enrollment_Request'. The entry criteria is set to 'Requested', and the record visibility is 'Administrator ONLY'. The initial submission actions include a 'Record Lock' action. The approval steps table shows a single step with the name 'Training Manager' and the criteria 'Manually Chosen'. The final approval actions section is also visible.

Action	Type	Description
Record Lock	Lock the record from being edited	

Action	Step Number	Name	Description	Criteria	Assigned Approver	Reject Behavior
Training Manager	1	Training Manager		Manually Chosen	Manually Chosen	Final Rejection

Milestone 7 – Student Tab

Purpose: Create a navigation tab for Student.

Steps:

- 103.
104. Open Setup and search Tabs.
105. Under Custom Object Tabs click New.
106. Select Student.
107. Choose a tab style.
108. Click Next.
109. Assign required profiles.
Save.

EVIDENCE OF STUDENT TAB

Milestone 7—Course, Instructor and Enrollment Tabs

Purpose: Create navigation tabs for remaining objects.

Steps:

110. Open Setup → Tabs.
111. Click on Course.
112. Create Instructor tab.
113. Create Enrollment tab.
114. Choose suitable styles.
115. Assign profiles.
116. Save each tab.

EVIDENCE OF COURSE, INSTRUCTOR AND ENROLLMENT TABS

Milestone 8 – Lightning Application

Purpose: Create the central SECMS Lightning application.

Steps:

117. Open Setup → App Manager.
118. Click New Lightning App.
119. Enter Student Enrollment & Course Management.
120. Add an optional description.
121. Choose Standard Navigation.
122. Assign required profiles.
123. Add Student, Course, Instructor, Enrollment, Reports, Dashboards, Home and Tasks.
124. Review settings.
125. Click Save & Finish.

EVIDENCE OF LIGHTNING APPLICATION

The screenshot displays the Salesforce Lightning Experience App Manager interface. The browser address bar shows the URL: `orgfarm-e105592599-dev-ed.develop.my.salesforce-setup.com/lightning/setup/NavigationMenus/home`. The page title is "Lightning Experience App Manager". The left sidebar shows the "Setup" menu with "App Manager" selected. The main content area displays a table of 33 items, sorted by App Name. The table columns are: App Name, Developer Name, Description, Last Modified Date, App Type, and Visible in L... (likely Lightning Experience). The table lists various Salesforce applications, including "My Service Journey", "Platform", "Queue Management", "Sales", "Sales Cloud Mobile", "Sales Console", "Salesforce Chatter", "Salesforce Scheduler Setup", "Service", "Service Console", "Shield", "Site.com", "Student Enrollment and Course...", "Student Enrollment Course Management", and "Subscription Management". The "Student Enrollment Course Management" application is highlighted in blue.

Milestone 9 – Enrollment Record Types

Purpose: Separate New Enrollment and Re-Enrollment.

Steps:

126. Open Enrollment → Record Types → New.
127. Create New Enrollment from Master.
128. Enable required profiles and select layout.
129. Create Re-Enrollment record type.
130. Enable required profiles and select layout.
131. Save.

Milestone 9 – New Enrollment Page Layout

Purpose: Show fields relevant to first-time enrollment.

Steps:

132. Open Enrollment → Page Layouts.
133. Clone the existing layout.
134. Name it New Enrollment Layout.
135. Keep Student, Course, Instructor, Enrollment Date, Status and Fees.
136. Remove unnecessary fields.
137. Save.
138. Assign it to New Enrollment.

NEW ENROLLMENT PAGE LAYOUT

Milestone 9 – Re-Enrollment Page Layout

Purpose: Show fields relevant to re-enrollment.

Steps:

- 139.
140. Clone the existing Enrollment layout.
141. Name it Re-Enrollment Layout.
142. Include previous enrollment reference if used.
143. Include Re-Enrollment Reason, Status and Fees.
144. Save.
Assign it to Re-Enrollment.

RE-ENROLLMENT PAGE LAYOUT

Milestone10–Flow:EnrollmentApprovedEmail

Purpose: Notify the student after approval.

Steps:

- 161.
162. Create an email template and alert.
163. Create a Record-Triggered Flow on Enrollment.
164. Trigger on update.
165. Set condition Enrollment Status = Approved.
166. Get the related Student.
167. Add Email Alert action.
168. Optionally notify Admin.
169. Update Student Status to Active.
Save and activate.

EVIDENCE OF FLOW: ENROLLMENT APPROVED EMAIL

The screenshot displays the Salesforce Flow Builder interface for a Record-Triggered Flow named "Enrollment Approved Action - V1". The flow is triggered by a record update on the "Enrollment" object. The flow steps are as follows:

- Record-Triggered Flow Start**: Object: Enrollment, Trigger: A record is created, Conditions: 1. Optimize for: Actions and Related Records. Open Flow Trigger Explorer for Enrollment.
- Run Immediately**: A connector step.
- Get Student**: Get Records action.
- Set Student Status Active**: Update Records action. The "Update Records" panel on the right shows the following configuration:
 - Label: Set Student Status Active
 - API Name: Set_Student_Status_Active
 - Description: (Empty)
 - How to Find Records to Update and Set Their Values: ☒ Use the enrollment record that triggered the flow. ☐ Update records related to the enrollment record that triggered the flow. ☐ Use the IDs and all field values from a record or record collection. ☐ Specify conditions to identify records and set fields individually.
 - Set Filter Conditions: Condition Requirements to Update Record: None—Always Update Record.
 - Set Field Values for the Enrollment Record: Field: Comments, Value: Set_Student_Status_Active.
- Send Student Email**: Email Alert action.

The flow is saved and activated. The bottom of the screen shows the Windows taskbar with the date and time as 01:53 AM on 26-09-2026.

Milestone11–EnrollmentsbyCourseReport

Purpose: Show enrollment count for each course.

Steps:

- 196.
197. Create a new Enrollments report.
198. Group rows by Course Name.
199. Show record count.
200. Save as Enrollments by Course.
Run and verify.

ENROLLMENTS BY COURSE REPORT

Milestone 11 – Revenue Report

Purpose: Show fees-paid enrollment revenue.

Steps:

- 206.
207. Create an Enrollments report.
208. Filter Fees Paid = TRUE.
209. Group by Course Name.
210. Summarize the relevant fee field.
211. Save as Revenue Report – Fees Paid.
Run and verify.

EVIDENCE OF REVENUE REPORT

Milestone12–StudentManagementDashboard

Purpose: Display project information visually.

Steps:

212. Open Dashboards → New Dashboard.
213. Enter Student Management Dashboard.
214. Select/create the dashboard folder.
215. Add Donut Chart using Students by Status.
216. Add Bar Chart using Enrollments by Course.
217. Add Gauge using Revenue Report – Fees Paid.
218. Add Table using Pending Enrollment Approvals.
219. Arrange components.
220. Save and click Done.

STUDENT MANAGEMENT DASHBOARD

Milestone 13 – Profiles

Purpose: Configure role-based access.

Steps:

221. Open Setup → Profiles.
222. Configure Admin with full access.
223. Configure Enrollment Officer with Create/Update access to Enrollment.
224. Configure Instructor with read-only access to assigned Enrollment.
225. Configure Student and Course access as required.
226. Save.

EVIDENCE OF PROFILES

Milestone 13 – Sharing Settings

Purpose: Configure record-level access.

Steps:

232. Open Setup → Sharing Settings.
233. Configure Student access.
234. Configure Course access.
235. Set Enrollment to Private where required.
236. Save.
237. Use ownership or sharing logic for instructor-specific enrollment access if required.

EVIDENCE OF SHARING SETTINGS

The screenshot shows the Salesforce Setup interface for Sharing Settings. The left sidebar contains a search bar with 'shar' entered and a list of navigation items: Security, Guest User Sharing Rule Access Report, and Sharing Settings (selected). The main content area is titled 'Sharing Settings' and displays a table of sharing settings for various objects. The table has four columns: Object Name, Sharing Model, Access Control, and a checkbox for 'Secure guest user record access'. The 'Work Plan' row is highlighted. Below the table, there are 'Other Settings' for 'Manager Groups' and 'Secure guest user record access'.

Object Name	Sharing Model	Access Control	Secure guest user record access
Test Suite Stage	Private	Private	✓
User Design Preference	Private	Private	✓
User Presence	Public Read Only	Private	✓
User Provisioning Request	Private	Private	✓
Utilization Alert	Public ReadWrite	Private	✓
Waitlist	Private	Private	✓
Web Cart Document	Private	Private	✓
Work Item	Private	Private	✓
Work Item Test Suite Group Execution	Private	Private	✓
Work Order	Private	Private	✓
Work Plan	Private	Private	✓
Work Plan Template	Private	Private	✓
Work Step Template	Private	Private	✓
Work Type	Private	Private	✓
Work Type Group	Public ReadWrite	Private	✓
Course	Public ReadWrite	Private	✓
Enrollment	Public ReadWrite	Private	✓
Instructor	Public ReadWrite	Private	✓
Student	Public ReadWrite	Private	✓

7.PROJECT PHASES

1. Project Ideation Phase

Problem identification, empathy mapping, brainstorming and prioritization.

2. Requirement Analysis Phase

Functional requirements, non-functional requirements, customer journey and technology stack.

3. Project Design Phase

Design of Salesforce objects, fields, relationships, layouts and application structure.

4. Project Planning & Scheduling

Planning milestones, task sequence and project activities.

5. Project Development Phase

Creation of objects, fields, relationships, validation rules, approval process, flows, reports, dashboards and security settings.

6. Testing Phase

Testing student, course, instructor and enrollment records, approval process, automation and reports.

7. Final Documentation

Compilation of project evidence, screenshots, advantages, disadvantages, conclusion and future scope.

8.SKILL WALLET STATISTICS

Project-related implementation statistics based on the completed SECMS configuration.

9.TASK ALLOCATION

Team Member	Role / Area	Allocated Tasks
Vivekaa S	Team Lead	Project coordination, Salesforce setup, Custom Objects and Fields.
Sufiya A M	Member	Object Relationships, Validation Rules, Approval Process and Record Types.
Swathi D	Member	Page Layouts, Flows, Reports, Dashboard and Testing.

14. FUNCTIONAL & PERFORMANCE TESTING

Screenshots captured during testing should be inserted in the spaces below. Each test has a dedicated page so the actual Salesforce evidence can be clearly documented.

Test 1 – Student Record Creation

Create and save a Student record and verify all required information.

EVIDENCE OF STUDENT RECORD CREATION

Create and save a Course record and verify course details.

Create and save a Course record and verify course details.

EVIDENCE OF COURSE RECORD CREATION

Test 3 – Instructor Record Creation

Create and save an Instructor record and verify instructor information.

EVIDENCE OF INSTRUCTOR RECORD CREATION

Test 4 – Enrollment Record Creation

Create an Enrollment and verify Student, Course, Instructor, Status and Fee fields.

EVIDENCE OF ENROLLMENT RECORD CREATION

Test 5 - ApprovalProcess

Submit an enrollment request and verify the approval/rejection process.

EVIDENCE OF APPROVAL PROCESS

Verify automatic date, email, instructor assignment or task creation.

Run reports and verify that the displayed records and totals are correct.

15. ADVANTAGES

- Centralized data
- Automated workflows
- Real-time reporting

16. DISADVANTAGES

- Salesforce dependency
- Requires initial configuration effort

FINAL COMPLETED PROJECT

17. CONCLUSION

The Salesforce Student Enrollment & Course Management System streamlines the student academic lifecycle from student registration and course creation to enrollment management, instructor assignment, approvals, revenue tracking and reporting.

The project demonstrates how Salesforce objects, relationships, validation rules, flows, approval processes, reports, dashboards and security features can be combined to create a structured academic management solution.

18. FUTURE SCOPE

- Payment gateway integration
- Student self-service portal
- Analytics-driven insights
- Mobile access support
