

Solution Requirements

Date	29 September 2026
Team ID	SWTID-2026-7365
Project Name	STUDENT ENROLLMENT & COURSE MANAGEMENT SYSTEM (SECMS)
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	Users securely access the Salesforce application with authenticated accounts.	High
2	Authorization levels	Access is controlled by user roles, profiles and sharing settings for permitted functions and records.	High
3	External interfaces	Uses Salesforce objects, flows and platform services; no external API is specified in the project.	Low

4	Transactions processing	Handles enrollment requests, approvals, payments and related student/course transactions within Salesforce.	High
5	Reporting	Generates reports and dashboards for students, courses, enrollments, approvals and project completion.	High
6	Business rules, etc.	Uses validation rules, approval processes, flows, record types and instructor assignment workflows.	High
7	Compliance to laws or regulations	Applies Salesforce access controls, sharing settings and protection of student and enrollment data; no specific law is named.	Medium
8	Other	Supports student, course, instructor and enrollment record management through the Lightning app.	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
------	--------------	-------------------------	-------------------------------------

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	Salesforce pages, record actions, flows and reports should respond without timeout during normal use.	Routine record creation, approval, flow and report tests complete successfully.
2	Scalability	Supports growth in student, course, instructor and enrollment records using Salesforce objects.	Core functions continue to work as project data volume increases.
3	Security & Data Privacy	Uses profiles, sharing settings, validation rules and controlled access for student and enrollment data.	Users can access only the functions and records permitted to their role.
4	Reliability & Availability	Approval processes, flows, record updates and reports should operate consistently.	Core workflows complete successfully without errors during testing.
5	Usability & Accessibility	Uses a Salesforce Lightning app with organized tabs, record types and page layouts.	Users can create, view and manage required records through the configured app.
6	Other	Maintainable configuration of objects, fields, relationships, flows, reports and dashboards.	Project components can be updated through Salesforce configuration and remain consistent.
