

Technology Stack

Date	29 September 2026
Team ID	SWTID-2026-7365
Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	Salesforce Lightning	Provides the user interface and app navigation for student, course, instructor and enrollment management.

2	Backend / Server-Side	Salesforce Flows	Automates enrollment workflows, approvals, notifications and status updates.
3	Database / Data Storage	Salesforce Objects	Stores Student, Course, Instructor and Enrollment data in the Salesforce data model.
4	Cloud / Hosting / Deployment	Salesforce Developer Org	Provides the Salesforce environment used to configure, run and demonstrate the SECMS solution.
5	Version Control & CI/CD	GitHub / Salesforce Configuration	Supports project source/configuration reference and demo documentation.

	(e.g., GitHub, GitLab, Jenkins)	Validation Rules & Approval Process	Enables email and fee validations and routes enrollment requests through approval and rejection workflows.
6	Third-Party APIs / Other Tools (e.g., Stripe, Twilio, Google Maps)	Validation Rules & Approval Process	Enables email and fee validations and routes enrollment requests through approval and rejection workflows.
