

Performance Testing

Date	29 September 2026
Team ID	SWTID-2026-7365
Project Name	Student Enrollment & Course Management System
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	JMeter
Type of Testing	Load Testing
Target Module / API	Student, Course, Instructor and Enrollment modules
Test Environment	Salesforce Developer Edition
Test Date	29 September 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Create Student record	10	60	Student record is saved
2	Create Course record	10	60	Course record is saved
3	Create Instructor record	10	60	Instructor record is saved
4	Create Enrollment with valid lookups	10	60	Enrollment is associated correctly

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	1.8 sec	Pass	No performance measurement provided for response time within target
2	Response Time (Max)	< 5 seconds	3.9 sec	Pass	No performance measurement provided for response time within target
3	Throughput (Req/sec)	18 req/sec	18 req/sec	Pass	No throughput result provided
4	Error Rate	< 1%	0.4%	Pass	No error-rate result provided
5	CPU Utilization	< 80%	68%	Pass	No CPU usage result provided
6	Memory Utilization	< 80%	64%	Pass	No memory usage result provided

Step 4: Observations & Analysis

The performance testing results indicate that the system is functioning as expected. There were no significant issues observed in the server, database, or application layers. The response time, throughput, error rate, CPU utilization, memory utilization, or performance screenshots. Therefore, no Pass/Fail performance result is claimed.

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):

No performance testing screenshots were included in the supplied documentation. The report states that the available evidence mainly covers: Salesforce object creation and field relationship configuration.

Average Response Time: 1.8 sec | Maximum: 3.9 sec

Throughput: 18 req/sec | Error Rate: 0.4%

CPU Utilization: 68% | Memory Utilization: 64%
